U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05)

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 – 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitabayashi et al. (U. S. Patent 6,894,841) in view Halsberghe et al. (U.S. Patent 6,984,042).

Kitabayashi et al. teaches the following claimed elements:

- A first panel (Fig. 3, 141) on a first surface (151) fixed to an optical kernel (150) and an image of the first panel being projected to a lens via the optical kernel.
- The optical kernel (150) comprises a plurality of color filters.

Application/Control Number: 10/711,951

Art Unit: 2851

- The color filters while in a specific direction are pervious to or reflect light with a specific color (150).
- The images of the first panel (141R) and second panel (141G) are stacked in to an integrated image at the focus position.
- The images of the first panel (141R), second panel (141G) and third
 (141B) are stacked in to an integrated image at the focus position.
- Where the first, second, and third panels are liquid crystal panels (141R, 141G, 141B) or liquid crystal on silicon panels.

Kitabayashi et al. does not teach:

- A second panel mounted onto a second surface of the optical kernel with a pin-to-hole method.
- A third panel mounted onto a third surface of the optical kernel with a pinto-hole method.

However, Halsberghe et al teaches the following:

- A second panel (106) mounted onto a second surface of the optical kernel with a pin-to-hole method (Fig. 3, 200).
- A third panel (106) mounted onto a third surface of the optical kernel with a pin-to-hole method (Fig. 3, 200).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use the pin-to-hole method in Halsberghe et al. to attach the panels instead of the fixed method of Kitabayshi et al. for ease of replacement of panels.

Application/Control Number: 10/711,951 Page 4

Art Unit: 2851

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert C. Do whose telephone number is (571)272-1387. The examiner can normally be reached on Monday Through Friday, 8am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on (571)272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
